

Mandatory constraints for the study plans in Environmental and Land Planning Engineering

In order to achieve the M.Sc. Degree, each Study Plan, either autonomous or recommended, as a whole (120 credits over 2 years) must compulsorily satisfy the following Statute Constraints:

- at least **56 credits** must be taken from courses of the **fundamental disciplines** (or "caratterizzanti", that is educational activities indicated with the letter **B** or **B/C** in the M.Sc. programme tables);
- at least **34 credits** must be taken from courses of the **complementary disciplines** (or "affini", that is educational activities indicated with the letter **C** or **B/C** in the M.Sc. programme tables);
- among these 34 credits of complementary type, at least **14 credits** must be taken from **purely complementary disciplines** ("affini puri", that is educational activities indicated **exclusively with the letter C** in the M.Sc. programme tables).

When checking the constraints before presenting your study plan, **each course indicated as B/C** must be **counted only once**, as either a course taken from a "fundamental" (B) or a "complementary" (C) course. In the annex, the course classification (B, C or B/C) according to the course SSD (scientific disciplinary sector) is attached for you convenience.

The above constraints refer to the overall study plan (120 credits foreseen in the 2 years of the M.Sc. programme) and are **mandatory**; therefore, all students are strongly recommended to take this information into account when preparing the Study Plan, starting already from their first year. By mandatory constraints, it is meant that **it is forbidden by the current regulations and laws to award the title of Master's Degree in Environmental and Land Planning Engineering** to students who have not respected them.

For any doubts on how to deliver the Study Plan and meet the above constraints, you can contact prof. Paola Gattinoni (for the programme tracks in Italian) or prof. Mirko Reguzzoni (for the programme track in English).
